28 Sir:

29

30 Please amend the above referenced application, using the revised

31 format.

## INTRODUCTORY COMMENTS

Applicant agreed to cancel, without prejudice, claim 1 in the parent application Serial No. 10/244,842 filed on September 17, 2002, so that a patent could issue promptly for the indicated allowable subject matter of claims 2 and 3. Claim 1 was amended to incorporate the limitations (internal and external frame assemblies) of claim 2. Applicant is continuing prosecution of claim 1 under this continuation application. None of the references cited in the Notice of References Cited (PTO-892) teach a transparent panel having the peripheral underside of a peripheral flange member in contact against the external surface of an opening in a panel.
